

STAINLESS STEEL CONSTRUCTIONS

FOOD INDUSTRY

Specialized Stainless steel products and constructions for the Food Industry. Turnkey solutions for the production of wine, the processing of olive oil and edible fats, the production of beer in breweries. Beyond the basic categories of wine, beer, oil and distils, a rich variety of products is available for other sectors of the food industry. Special constructions for the pharmaceutical or chemical industry and other sectors where stainless steel is used in production and support equipment.

oil

STORAGE TANKS | BOTTLING | MIXING | TRANSPORT NETWORKS | ADDITIONAL EQUIPMENT

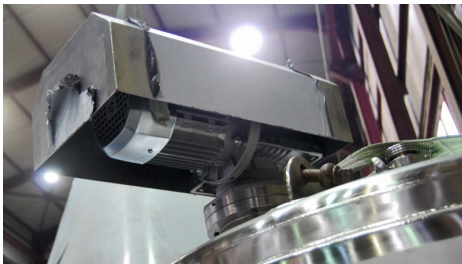

Study, design and manufacture of specialized products for the processing of olive and vegetable oils, such as storage, mixing and bottling tanks, as well as product transport networks. An ideal partner in this field of operation with excellent production quality and know-how, variety in sizes, reliability, consistency and after sales support.

dairy products

MILK & CREAM TANKS | YOGHURT TANKS | OTHER APPLICATIONS

Milk & dairy products have always been a cornerstone of the human nutrition. An extended range of equipment that covers a wide spectrum of applications in the dairy industry is available. Made with excellent quality and with the strictest standards, milk tanks offer high levels of hygiene, easy cleaning and disinfection, factors which are critical to ensuring product quality.

wine

FERMENTATION TANKS | RED WINEMAKING | STORAGE | STABILISATION | PRE-FERMENTATION CRYO-EXTRACTION | SPARKLING WINE | EQUIPMENT

The intense change in the winemaking sector gave the potential to cooperate with oenologists and winemakers, creating and developing various types of wine-producing tanks, in order to meet the needs of modern winemaking but also the different application techniques. The wide range of products includes a variety of tanks and equipment for red and white winemaking, as well as products for the production of sparkling wines.

beer

TURNKEY SOLUTIONS | BEER BREWING TANKS | BREWING TANKS | PILOT SYSTEMS

The development of technology has brought methodical and controlled beer production in brewery units, where the aim is to produce in a mass quantity and a large variety. Quality assurance, increased yield and economy of scale are critical factors for the sustainability and development of a brewery.

distils | beverages

STORAGE TANKS | MARC FERMENTATION TANKS | MIXING TANKS | ADDITIONAL EQUIPMENT

At the side of the modern distiller and drink producer, and supported by many years of experience, we can offer the best solutions, always with a view to the real needs of the customer.

other applications

FAT PRODUCTS | PHARMACEUTICS - COSMETICS | INDUSTRY | CLEANING (C.I.P.)

Wide range of products for other sectors of the food industry as well as for the pharmaceutical or chemical industry and sectors where stainless steel is used in production and support equipment. Custom solutions usually result from specific requirements in the production of an innovative product or even from the specific requirements of a customer.
